

## Product data sheet for uvex unigrip PL/CL

The uvex unigrip PL and CL protective gloves in knitted polyester are ideally suited for use in damp and wet working environments. Thanks to the latex coating on the palms and fingertips, the protective gloves offer very good grip, both in dry and wet working conditions. The protective gloves also guarantee a good fit and flexibility thanks to the material composition. This makes the uvex unigrip PL and CL models particularly suitable for work in the construction industry, for example.

### Features

- Good mechanical abrasion resistance

### Suitability for industrial working environments

- Suitable for damp and oily work environments

<b>Material number</b>	60599
