noratherm

Brave the cold with our fully waterproof thermal boot

PU TECHNOLOGY

Polyurethane, that contains millions of tiny air bubbles, making the boots lightweight and giving excellent thermal insulation.

In addition hydrolysis protection and anti-UV additives make product hardwearing and durable, lasting up to 3 to 4 times longer than traditional PVC and rubber boots.

COMFORT

Nora products have been designed with you in mind, the anatomical shaped footbed provides arch support and additional material around the ankle gives extra protection.

To further enhance your comfort ergonomic removable insoles are included with every pair of boots, this attention to detail distinguishes Nora PU boots from other boots in the market.

DESIGN

Designed and manufactured in Italy.

Our research and development team evaluated real life situations when designing each details on products. The uppers are practical, smooth & stylish.

Made in Italy

NORA is a registered trademark, which is distributed by:
